

2-Output ASI TS Distributor

Overview

2-output ASI TS distributor is one of the main equipments for digital TV head-end. It supports 2xASI input receiving data of DVB transport stream (TS) from encoder, multiplexer, DVB gateway, scrambler, video server and other DVB head-ends, and outputs 2 groups of ASI (each group with 8xASI).

Features

- ◆ Full hardware implementation, high efficiency and stability
- ◆ Real-time transport stream monitoring
- ◆ LCD display in Chinese and English, easy and flexible to operate
- ◆ LCD/Keyboard control and network management
- ◆ High reliability and stable operation

Technical Specification

ASI Input	BNC interface
-----------	---------------

ASI Output		2 groups (8×ASI/group), BNC interface
General Features	Size	482mm×280mm×44mm
	Temperature Range	0~45°C (Operation); -20~80°C (Storage)
	Power	100-240VAC, 50Hz, 25W
